## *Bonus* Why you should use the same profile photo *on every platform*

-  **You will be easily recognizable. You only have seconds to keep someone's attention online, if they are researching you or your business you don't want them to have to wonder if they have the right page.**
-  **It leads to trust. Your audience will quickly see the consistency in your brand & immediately know what to expect from you & your business.**
-  **Unless you are a nationally recognized business, you want to use your photo (NOT your logo), because visitors will make a personal connection with the face of your brand.**
